

Basics of Value Based Care and Payment

Karla Weng, MPH, CPHQ

Rural Health Value

Rural Quality Grantee Webinar: February 22, 2023

1

2

Vision: To build a knowledge base through research, practice, and collaboration that helps create high performance rural health systems

- HRSA FORHP Cooperative agreement
- Partners
 - RUPRI Center for Rural Health Policy Analysis and Stratis Health
- Activity
 - Resource development and compilation, technical assistance, research

2

Today's Session

- The shift to value-based care and payment began more than a decade ago
 - But has been more slowly adopted in rural health care delivery and payment
- Today's session is a brief orientation to where we are today in value-based care and payment through the rural health lens
- Objectives include:
 - Provide core knowledge and shared language to be conversant in value-based care and payment
 - Help your team identify and consider opportunities and actions that support the journey toward value

What is "Value"?

Terminology has been evolving – and depends on your point of view!

Description	Source/Timeline
Value= (Quality + Experience)/Cost	Seminal article: The Triple Aim: Care, health, and cost , Institute for Healthcare Improvement, 2008
Improved Community Health, Better Patient Care, Smarter Spending	Improving our Health Care Delivery System , Fact Sheet, Center for Medicare and Medicare Services, January 2015
A Health System that Achieves Equitable Outcomes through High Quality, Affordable, Person-Centered Care	Driving Health System Transformation – A Strategy for the CMS Innovation Center's Second Decade , Center for Medicare and Medicaid Innovation, October 2021

What is value-based payment?

Value Based Payment (VBP) is a method by which **purchasers** of health care (including government, employers, and consumers) and payers (public and private) **hold the health care delivery system** (physicians and other providers, clinics, hospitals) **accountable** for both **quality and cost** of care.

- VBP rewards health care providers for keeping people healthy - and for providing the right care, at the right time, in the right place.

What is value-based care?

To be successful in value-based payment models, you need to deliver value-based care:

- Emphasize prevention and wellness, in addition to treatment
- Focus on improving outcomes
- Help patients navigate the healthcare system
- Integrate and coordinate care
- Help patients address health-related social needs

The “value” in value-based care is derived from measuring quality and patient experience against the cost of delivering the health outcomes.

Focus on value is accelerating...

The Health Care Payment Learning & Action Network (HCP LAN) is a public and private partnership dedicated to providing thought leadership, strategic direction, and ongoing support to accelerate adoption of alternative payment models (APMs).

HCP LAN Goal Statement:

Accelerate the percentage of US health care payments tied to quality and value in each market segment through the adoption of two-sided risk alternative payment models

	Medicaid	Commercial	Medicare Advantage	Traditional Medicare
2024	25%	25%	55%	50%
2025	30%	30%	65%	60%
2030	50%	50%	100%	100%

<https://hcp-lan.org/>

Form Follows Finance

- How care is delivered care depends on how we are paid for care
- Transition to value is changing both payment and delivery
- Fundamentally, reform involves transfer of financial risk from payers to providers

Health Care Payment Learning and Action Network (HCP LAN)

Alternative Payment Model Framework

			
CATEGORY 1 FEE FOR SERVICE - NO LINK TO QUALITY & VALUE	CATEGORY 2 FEE FOR SERVICE - LINK TO QUALITY & VALUE	CATEGORY 3 APMS BUILT ON FEE-FOR-SERVICE ARCHITECTURE	CATEGORY 4 POPULATION - BASED PAYMENT
	A Foundational Payments for Infrastructure & Operations (e.g., care coordination fees and payments for HIT investments)	A APMs with Shared Savings (e.g., shared savings with upside risk only)	A Condition-Specific Population-Based Payment (e.g., per member per month payments, payments for specialty services, such as oncology or mental health)
	B Pay for Reporting (e.g., bonuses for reporting data or penalties for not reporting data)	B APMs with Shared Savings and Downside Risk (e.g., episode-based payments for procedures and comprehensive payments with upside and downside risk)	B Comprehensive Population-Based Payment (e.g., global budgets or full/percent of premium payments)
	C Pay-for-Performance (e.g., bonuses for quality performance)		C Integrated Finance & Delivery Systems (e.g., global budgets or full/percent of premium payments in integrated systems)
		3N Risk Based Payments NOT Linked to Quality	4N Capitated Payments NOT Linked to Quality

Health Care Payment Continuum

A Road Trip Analogy...

Let's look at:

- The road to value-based payment
- The components of a 'car' that supports the drive to value-based care
- The key factors in mapping a route to value

The Road: Payment Models

- **Starting line:** Fee-for-service (FFS)
- **Slow lane:** Incremental modifications with incentives (ex. quality scores)
- **Moderate lane:** Elements of restructuring health finance but leaves in place current FFS infrastructure (ex. ACO)
- **Fast lane:** Blows past current structure to a total redesign of payment, aligned with quality measures (ex. global budget)

Track 1: The Starting Line (Fee For Service)

- In 2021, only 15% of Medicare FFS payments, and 40% of all types of payments have **no** link to quality or value.*
- Still at the Medicare FFS starting line:
 - Critical Access Hospitals
 - Rural Health Clinics
 - Federally Qualified Health Centers

*Source: [2022 APM Measurement Infographic - Health Care Payment Learning & Action Network \(hcp-lan.org\)](https://www.hcp-lan.org/2022-APM-Measurement-Infographic)

Track 2: The Slow Lane

- Incentives affecting small percentage of payment
- Retaining the FFS payment design
- Examples include:
 - Pay-for-Reporting/Pay-for-Performance related to quality measures
 - Care Coordination Fees

Track 3: A Moderate Pace with Potential for More Rapid Pace

- Fee-for-service chassis remains in place:
 - Incentive (or risk) is tied to total expenditures
 - Linked to quality measurement
- Examples include Accountable Care Organizations (ACOs) or Shared Savings Programs.

Track Four: The Fast Lane

- Total redesign of payment, typically aligned with quality measures or transformation requirements
- Examples include:
 - Global budgets
 - Capitation/Population-based payments

Accountable Care Organizations (ACOs)

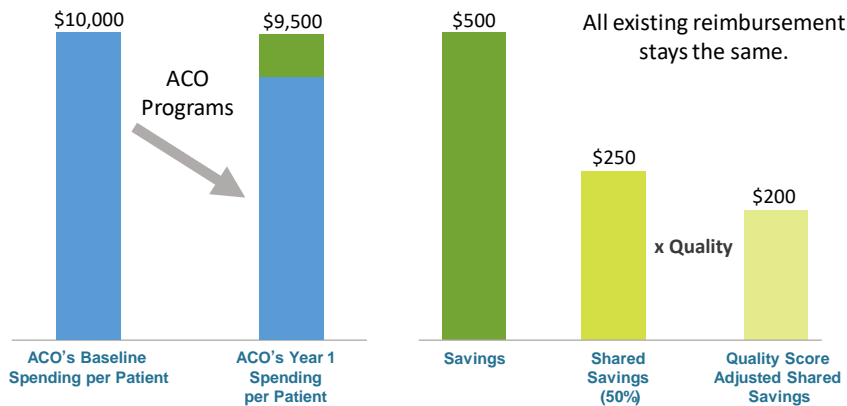

- ACOs are also known as **shared savings** organizations.
- Groups of providers (generally physicians and/or hospitals) that receive financial rewards for improving the quality of care for a group of patients while reducing the cost of care for those patients.

Source: "All-Payer Spread Of ACOs And Value-Based Payment Models In 2021: The Crossroads And Future Of Value-Based Care", Health Affairs Blog, June 17, 2021.

ACO "Shared Savings" Financing

Why Travel Down ACO Lane?

Medicare Shared Savings Program (SSP) ACOs have been a low-risk opportunity for rural organizations to try out value-based strategies (training wheels)

- Network/Aggregate across communities for scale and support (minimum of 5000 beneficiaries)
- In 2023, 467 CAHs and 2,240 RHCs are participating in SSP*
- New regulatory changes to support increased engagement of rural health care organizations: [Rural Health Value Policy Brief: SSP 2023 Regulatory Changes and Rural Implications](#)
- Opportunity for strategic investments using advance payment or other commitments
- Build process and infrastructure for prevention, chronic care management, care coordination, and integration of behavioral health
- Understand and utilize claims data to help manage care
- Build delivery systems that can negotiate contracts with other payers

*2023 Shared Savings Program Fast Facts (cms.gov)

Road Conditions: Market Factors

- Growth in Medicare Advantage
 - Rural enrollment in Medicare Advantage plans has grown steadily to more than 3.7 million (34.6%) nationally in 2021*
- State Medicaid Program Redesign
 - Managed Care
 - ACO and other value-type payment structures
- Commercial/Private Insurance
 - Variety of VBP incentives
 - Increasing costs/patient risk-sharing
 - Narrow networks

*[Medicare Advantage Enrollment Update 2021](#) RUPRI Center for Health Policy Analysis. State maps (county level) and data tables are available.

Finding Your Pace

- CMS has indicated they want 100% of Traditional Medicare to be in "accountable care relationships" by 2030...
- The shift to the fast lane is underway, but **road conditions matter**: different paces in different places and from different payers
- If you are currently sitting at the starting line... Consider ways to start building momentum

How do you build your value-based care "car"?

- **Driver: Leadership**
 - Facilitate and/or support community planning, coalitions, and connections
 - Identify resources and invest strategically
 - Engage staff, clinicians, patients, and caregivers
- **Engine: Finance**
 - It may take multiple types of 'fuel' to get you going
 - It can take time to build up speed - look for opportunities to pilot and test
 - Watch your gauges, a balanced set of indicators is important
- **Body: Strategies to Improve Health and Value**
 - Consider ways to address pressure points: inappropriate ED visits, increasing preventive services, care management, behavioral health
 - Develop reinforcements and safety features such as data analytics, Health Information Exchange (HIE), appropriate coding and billing
- **Wheels: Community Partnerships**
 - It is hard to move past the starting line without good tires
 - Maintaining tire pressure: spreading resources to meet needs through the appropriate agencies or partners

How can you map a route to value?

- Assess your capacity to deliver value-based care
 - Resource: [Value-Based Care Assessment Tool | RuralHealthValue.org](https://www.ruralhealthvalue.org/resources/value-based-care-assessment-tool/)
- Work together in networks to maximize efficiency, shared volume and needed resources
- Consider strategy alignment with value-based care incentives:
 - Potentially avoidable utilization
 - Annual wellness visits and preventive services
 - Improve on quality metrics
 - [Aligning Quality Measures across CMS — The Universal Foundation | NEJM](https://www.nejm.org/doi/full/10.1056/NEJMra1901000)
 - Care coordination and care management

Getting from Volume to Value

- New organizational skills and resources
- Investment in value-based care capacity
- *Discriminating* approaches
 - Environmental insights
 - Attentive partnerships
 - Thoughtful experiments
 - Learning continuously
- **Balance** optimizing operations and testing new ideas

Rural Can Do This Well!

- While the road isn't always smooth, rural communities and health care organizations can and are delivering value-based care and succeeding in value-based payment programs.

Pulse Check
Rural system high performance

Value-Based Care Assessment - Assess capacity and capabilities to deliver value-based care. Receive an eight category readiness report.

Physician Engagement - Score current engagement and build effective relationships to create a shared vision for a successful future.

Board and Community Engagement - Hold value-based care discussions as part of strategic planning and performance measurement.

Social Determinants of Health - Learn and encourage rural leaders/care teams to address issues to improve their community's health.

We're here to help!

- Virtual consultations with the Rural Health Value team are available!
 - Review local 'road conditions'
 - Discuss how your grant project aligns (or could align) with VBP
 - Identify strategies to build your car, or map your route
- If you are interested in scheduling a meeting...
There is no wrong door:
 - Karla Weng, kweng@stratishealth.org
 - Contact your GHPC TA provider or your FORHP PO

Thank you for your work to improve the lives of rural people and communities!
